

VEDANT DUBEY

Noida, India • +91-8368530934 • vedantdubey020@gmail.com • github.com/vedantdubey19 • linkedin.com/in/vedantdubey20/

PROFESSIONAL SUMMARY

B.Tech CSE (Data Science) student experienced in developing ML, Deep Learning, Computer Vision, and Generative AI applications. Skilled in Python, PyTorch, TensorFlow, Scikit-learn, LangChain, and LLM-based systems with hands-on experience in ML pipelines, RAG applications, model deployment, and optimization.

TECHNICAL SKILLS

Languages: Python, SQL, Java

ML / DL Frameworks: PyTorch, TensorFlow, scikit-learn, MediaPipe, OpenCV, Hugging Face Transformers

Data & Analytics: NumPy, Pandas, Feature Engineering, Model Evaluation, Statistical Analysis, Predictive Modeling, EDA

Deployment & DevOps: Streamlit, FastAPI, Flask, Git, GitHub, Supabase, Render, Docker, CI/CD

Core Concepts: Computer Vision, NLP, Transfer Learning, Supervised & Unsupervised Learning, Deep Neural Networks, RAG, LLMs

PROJECTS

Study AI — AI-Powered Learning Assistant | Python • LangChain • ChromaDB • Streamlit • FastAPI

GitHub: https://github.com/vedantdubey19/Study_AI | Live Demo: studyai-6q5gxcbb14l63jh8clpnf5.streamlit.app/

- * Developed an end-to-end Retrieval-Augmented Generation(RAG) pipeline that processes PDF documents, generates vector embeddings, and enables semantic question answering, improving response relevance by grounding answers in retrieved content.
- * Engineered an AI-powered learning platform integrating LangChain, ChromaDB, and Gemini API to deliver context-aware responses while minimizing LLM hallucinations through retrieval-based prompting.
- * Built and deployed an interactive Streamlit application with an optimized document ingestion workflow supporting multi-document uploads, real-time querying, and efficient semantic search.

Hire Sense AI — AI Resume Screening & Interview Assistant | Python • LangChain • ChromaDB • LLM • Streamlit

GitHub: <https://github.com/vedantdubey19/HireSense-AI> | Live Demo: hire-sense-ai-beta.vercel.app/

- Built an AI-driven recruitment assistant that analyzes resumes against job descriptions using semantic similarity and LLM-based evaluation, generating ATS insights and personalized interview questions.
- * Designed an automated resume processing pipeline with skill extraction, keyword matching, and candidate ranking, reducing manual screening effort through intelligent candidate evaluation.
 - * Developed scalable REST APIs using FastAPI and integrated an interactive dashboard for recruiters to review candidate insights and hiring recommendations in real time.

Pulse AI — AI-Powered Observability & Incident Analysis | PyTorch • VGG19 • Flask • Python

GitHub: https://github.com/vedantdubey19/Pulse_AI | Live Demo: pulse-ai-pi.vercel.app

- * Developed a scalable telemetry ingestion service capable of processing 2,000+ log events per second during load testing, enabling real-time monitoring for distributed applications.
- * Implemented an LLM-powered log analysis pipeline that correlates application logs, identifies probable root causes, and generates concise incident summaries to accelerate debugging workflows.
- * Built containerized backend services using FastAPI, MongoDB and Docker, integrating observability dashboards to visualize application health, system metrics, and anomaly detection.

EXPERIENCE

AI/ML Intern — IBM (PBEL Program)

September 2025 – November 2025

- * Developed and optimized a supervised ML classification model through a complete pipeline: data collection, exploratory data analysis (EDA), preprocessing, feature engineering, and hyperparameter tuning — achieving 88%+ accuracy on a structured business dataset.
- * Evaluated and compared model performance across Accuracy, Precision, Recall, and F1-Score metrics; applied feature importance analysis to identify the top predictors driving classification outcomes.
- * Communicated data-driven findings and strategic recommendations to program mentors, translating technical model metrics into actionable business insights for non-technical stakeholders.

DATA SCIENCE Intern- Oasis Infobyte

July 2026 - August 2026

- * Built 5+ end-to-end data science projects involving spam detection, sales forecasting, customer segmentation, and predictive analytics using Python, Pandas, Scikit-learn, and Matplotlib.
- * Designed reusable data preprocessing pipelines by handling missing values, encoding categorical features, scaling data and engineering features to improve model reliability and performance.
- * Presented analytical findings through interactive visualizations and performance reports, comparing multiple machine learning algorithms using Accuracy, Precision, Recall, and F1-Score to recommend the best-performing models.

EDUCATION

B.Tech in Computer Science Engineering (Data Science Specilization).

2023-Present

Lloyd Institute of Engineering and Technology, AKTU | CGPA: 7.56

CERTIFICATIONS AND TRAINING

- | | |
|---|----------------------|
| * IBM AI/ML Internship —PBEL Program Supervised Learning, Model Evaluation, Feature Engineering | Sept 2025 – Nov 2025 |
| * Oracle Cloud Infrastructure 2025 Certified AI FoundationsAssociate —Oracle | September 2025 |
| * Amazon Bedrock Customization, Optimization & Automation —Amazon Web Services (AWS) via Coursera | June 2026 |
| * Oracle Cloud Infrastructure 2025 Certified Generative AI Professional —Oracle | October 2025 |
